*In progress, to compare playlist compatibility*

- Spotify API OAuth 2.0
- 

*I'm Jenny, a software engineering bootcamp graduate looking for creative frontend or full stack work in Northern Virginia. As an RN, I developed resourcefulness, discipline, efficiency, perspective, attention to detail, and collaboration. I preceptored and won multiple Spirit Awards. Bedside nursing was not a lifelong plan for me, but a path to gain professional skills and contribute to others' wellbeing. I seek to continue learning and contributing to important projects!*  
*Thank you for viewing my resume.*
